About This Game

Mushroom Crusher Extreme is a retro-styled arcade-action game, in which you take control of Zenon, a mage with a mission to repel an invasion of giant Shrooms on his native archipelago. Battle against time and use your elemental magic to vanquish the invaders before it's too late!

Along with retro visuals, Mushroom Crusher Extreme follows old-school gameplay sensibilities: simple on the outside, complex on the inside. Though unforgiving to beginners, understanding its mechanics will lead to a satisfying experience.

Features:

- Survive the onslaught and BATTLE more than 15 types of vicious Shrooms
- COMBO your arsenal of elemental spells and MATCH them against enemy weaknesses to fight your way to victory.

-
- Collect spores and redeem rewards. Hard-won accomplishments UNLOCK more spells, levels and goodies for your ever-expanding inventory
 - EQUIP different combinations of Spells and status-enhancing Trinkets to customize Zenon's powers
 - Summon the help of a friend in ONLINE or LOCAL CO-OP MODE
 - EXPLORE beautiful, handcrafted levels and rid the world of Shrooms once and for all!

Being a person that always heard about Leisure Suit Larry, the game history, and watching a few letsplayes i cant say i came in completely blind. But over all if you are looking for an interesting point and click adventure game with all the fixings of comedy, absurdity, and headscratching solutions that point and click games are known for: then your in the right place. Leisure Suit Larry - Wet Dreams Don't Dry perfectly encapsulates the essence of the series without relying to heavily on T&A. Definitely get it if you have some money burning a hole in your wallet, or want to try a Leisure Suit Larry game for yourself.. I picked this game up on a whim some time ago. Zombie Exodus is a very well written choose-your-own-adventure story that grips you and keeps you within minutes of starting. All of the events are well described, the characters are unique and have their own stories.

Everything is so well described, it paints such a vivid picture in your mind of what's going on and what you're seeing. The story is so good and the events are so memorable, that even many months later I can still remember the events that ocured and the choices I made from start to finish.

I would absolutely recommend this game.. Can we have a rule in the future that 'challenge modes' don't count as DLC?

Please don't sell us what is already in the game...

Also, not all of us enjoy 'challenge modes' that just consist of turning up the difficulty... Or challenge modes of any sort.. first of all this game takes 20 minutes and what the f*** about this bullets omg why they are too slow when i shoot i wait for my bullets to hit target and why frame rate is that much low i mean i could play gta v min. 30 fps what about it its maximum 20 fps as a result its not problem that the game is 20 minutes because its 2 turkish lira so its not problem for me just bullets and frame rate is problem

and this part is just for the studio of this game , OMG please dont do to be continued again i hate it and i think everybody hates it dont again. it is so stupid it is for computer yet it uses a controller wich hardly anyone has

Dad Goku is Stronk EVERYTHING.

Also, I LOVE Bardock's Theme btw . Great game.. <https://youtu.be/T6bOxCV1Exc>

Despite the simple tilt based controls, this feline adventure offers a lot of exploration. The difficult stays firmly in the chill zone but feels just right for what is being offered.. 10/10 amazing infinite runner for PC.. great time killer its very challenging fun and music isnt annoying. Pretty boring. I thought it would be like a reverse rubix cube puzzle game but the camera/aiming controls are♥♥♥♥♥ the music is the same 10 sec loop featured in the trailer repeating forever, and the combo system is shallow. There's plenty of other good puzzle games on Steam so skip this.

A few bugfixes and announcement about content drop:

I just fixed more bugs where you could fire one naration more times or even worse more times at once.

In the content drop I will add an easter egg in the form of a parody about an rpg maker game.

If you find many of those bugs that let you run one narration more times, please do let me know down here in the comments. Thanks to [God is a Serb](#) for pointing out a lot of bugs which were fixed.

For some reason though if you are in WinXP and want to rush through, please do not skip the narrations as it might or might not break the game for you and you will have to restart it. Expect this to be fixed tomorrow or ASAP.

Thanks again,
